"Freedom"

Freedom means a lot to me. The three most important things about freedom to me are, we can vote, we can have good jobs, and we can have a good education. These reasons are very important to me. Those three things are my keys to freedom. That is what I think of that.

Voting is extremely important. We vote in a democracy to choose our political leaders.

And if we can't choose who we want as a leader, that is not much freedom, if you ask me. If we have the power to choose our leaders, then that's what I call freedom. That's one thing freedom is.

Good jobs are important also. Jobs give us money and work to do. So, jobs have an important role in freedom to me. People need jobs to keep other people out of the streets. That is what makes jobs so important.

An education is the most important part of freedom. You need an education for many jobs and voting. Without an education, you wouldn't do good on your job or jobs that you might have. What if you had a job dealing with some math, and with no education, you wouldn't know how to do what you need to do.

So that concludes what freedom means to me. Freedom is voting, being able to have a job and having an education. All of these things effects freedom in a big way. Without any of those things, you can't have freedom at all.

What Freedom Means To Me

Freedom is the ability to move or act freely. To me everything that I am able to do because I can act freely, can all be narrowed down to three very important things that mean a lot to me. The first is being able to go to school and get my education. The second is being able to speak my mind. The final thing is for me to choose my career.

Going to school and getting my education is apart of my freedom because I don't have to go to a different school, that would give me a lower education than I need, because of my race. Getting a good education will help me to choose a great career when I get older, and I don't have to settle for less. Being able to speak my mind is also apart of my freedom because I can give my opinion about a subject and won't get thrown in jail because of it.

Now that I have written this paper, I understand how important freedom is in my life. I also understand how hard it must have been for those of whom didn't have freedom in the past, as I would not have been allowed to go to school and get an education, get a good career, or even speak my mind. If I couldn't do these three things, then I can only imagine what else I would not have been able to do. I now realize how thankful I am for freedom and I am truly grateful to those who fought for it.

What Freedom Means To Me?

You may wonder what freedom is. Most people take their freedoms for granted. They think freedom is just being wild and not doing what is asked of them. They think freedom is not listening to others and controlling themselves. There are many types of freedoms. But what they don't know is the basic meaning of freedom. Freedom is the ability to move around freely without breaking a law. But there's more to it in that. It doesn't mean to behave outrageously because you can and you have a right to do it.

Many years ago, people of my race weren't free. They were made slaves and they were always taken advantage of by other races. I wouldn't want anything like that to happen again. That's why I try to do what I'm supposed to do and I know my limits. I mean I enjoy being free but I make sure I don't pass my boundaries because I know that some people don't even have as much freedom as I do now.

If people used their different freedoms in positive ways, there wouldn't be many problems like there are in the world today. For example, people have freedom of speech which usually gets them into arguments and conflicts. They say whatever they want and most of the time it's rude and out of line. To solve some of the problems, I think people should use their freedoms freely but they should be caring and respectful while doing it. They shouldn't hurt people's feelings because they're different and they have different customs than they may have. It's not right and it's mean. This is what freedom means to me.
